

AUXILIARY EQUIPMENT

GEEL 10

Single-phase petrol-powered generators

The economical, yet rugged portable GEEL generator series is designed to fit every job site and every budget.

The GEEL 10 generators provide hours of reliable job site power and performance. They are ideally suited for construction, industrial, commercial, domestic and farm applications.

- Rated voltage: 120-230-125/250V // Frequency: 50-60 Hz
- GEEL 10 is equipped with wheels and foldable handles for easy transport
- A fully wrapped frame with heavy duty steel bars protects the generator under rugged job site conditions. Lifting point included
- Superior performance shock mounts minimize vibration for longer machine life
- Unique diversion trench fuel tank design for increased safety and user-friendliness
- Installed with digital voltage, frequency and time display

Technical Data

MODEL	Weight (Kg)	Dimensions (mm) (LongxWidexHigh)	Output		Rated current (A)	Engine	Engine displacement (cm3)	Fuel tank capacity (l)
			Rated power (KW)	Max. power (KW)				
GEEL 10	143	860 x 620 x 650	8.5	9.5	37	ENAR LC196FD 13.3 KW // 3,600rpm	622	48
