

## VIBRATION RANGE

# BOXEL

## Electronic high frequency converter

The BOXEL electronic converter stands out for its lightweight and performance, in comparison to traditional solutions.

- 5 metres cable
- Protective structure made up of rubber closures and aluminum handles
- BOXEL is compatible with all high-frequency pokers in the market
- It works with a low safety voltage of 42V, there is no risk of electric shock

### Connection possibilities

MODEL	M38	M5	M6	M7	M8
BOXEL 215	x2	x2	x1	x1	x1
BOXEL 225	x2	x2	x2	x1	x2
BOXEL 325	x3	x3	x2	x1	x2

\* Number of M-AFP ENAR pokers that can be connected at the same time to each BOXEL model.

### Technical Data

MODEL	Dimensions (cm) (LongxWidexHigh)	Weight (kg)	N° of outputs	Input		Output

#### + Light and compact

Light and little bulky. Very manageable and robust. Aluminum case and shockproof protection.

#### + Superior performance

Intelligent system that maintains optimal frequencies and voltages, obtaining a greater volume of vibration in less time.

#### + Total protection

Waterproof resined plate; protected against high temperatures. Complete safety and insulation (IP65).

#### + Zero maintenance

It does not require spare parts. Zero maintenance. Does not generate waste. Silent. 90% energy efficiency.
