

AUXILIARY EQUIPMENT

GEEL 2i

Single-phase petrol-powered generators

The GEEL 2i is a lightweight, powerful and incredibly reliable single-phase generator.

In this suitcase style generator with carefully developed inverter technology, a lightweight microprocessor replaces the traditional heavy alternator and helps maintain a smooth, consistent output power with no fluctuations.

- Rated voltage: 120-230-125/250V. // Frequency: 50-60 Hz
- 4 hours of continuous running time at rated power
- Reliable and powerful 4-stroke 79cc gasoline engine equipped with low oil sensor
- Lightweight, portable, compact and easy to carry at 21kg
- Inverter technology; Silent operation and clean electrical output
- Easy to use and operate control panel with indicator lights and DC 12V output for charging function

Technical Data

MODEL	Weight (Kg)	Dimensions (mm) (LongxWidexHigh)	Output		Rated current (A)	Engine	Engine displacement (cm³)	Fuel tank capacity (l)
			Rated power (KW)	Max. power (KW)				
GEEL 2i	21	499 x 285 x 455	1.6	1.8	7	ENAR LC148F 2.2 KW // 5,000rpm	79	4
