

AUXILIARY EQUIPMENT

GEEL

Single-phase petrol-powered generators

The economical, yet rugged portable GEEL generator series is designed to fit every job site and every budget.

The different GEEL 3, GEEL 5 and GEEL 7 generators provide hours of reliable job site power and performance. Ideally suited for construction, industrial, commercial, domestic and farm applications.

- Automatic voltage regulator system (AVR) for automatic voltage regulation
- Rated voltage: 120-230-125/250V // Frequency: 50-60 Hz
- GEEL 5/7 models are equipped with wheels and foldable handles for easy transport
- GEEL 5/7 models include electric starting system
- A fully wrapped frame with heavy duty steel bars protects the generator under rugged job site conditions
- Superior performance shock mounts minimize vibration for longer machine life
- Unique diversion trench fuel tank design for increased safety and user-friendliness
- Installed with digital voltage, frequency and time display
