

VIBRATION RANGE

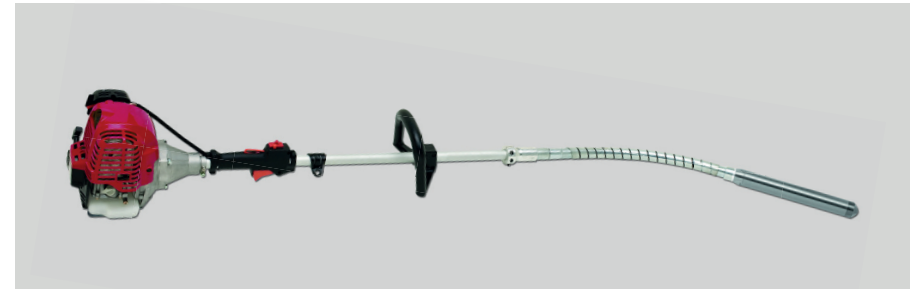

VIB-BAR

Petrol-powered portable vibrator

ENAR's VIB-BAR is a portable vibrator powered by a petrol engine.

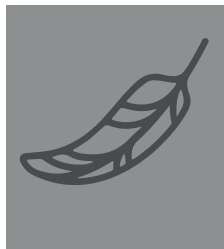

- Centrifugal clutch
- Handle counts with embedded throttle
- Includes harness for transport
- 4 double-sealed oil-lubricated bearings
- Outer part of the transmission reinforced with metal strip
- Oversized eccentric

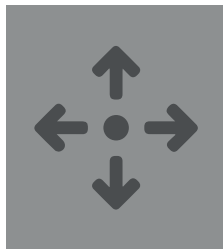

+ Cordless

A petrol engine powers the VIB-BAR, therefore it does not require an electrical connection, increasing site safety.

+ Lightness

Users enjoy great comfort thanks to the lightweight of the driving unit and the ergonomic support.

+ Mobility

It is ideal for works where there is no electricity supply, allowing great mobility for the user.

+ Horizontal works

Thanks to its harness, which provides excellent handling and comfort, it is the ideal alternative for horizontal works.

Technical Data VIB-BAR

MODEL	Weight (kg)	Power (CV)	Fuel	Engine	Engine Capacity (CC)	Speed (r.p.m.)
