

VIBRATION RANGE

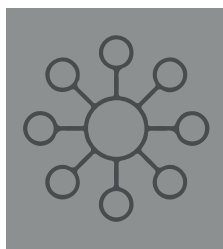

TDX

Flexible transmissions for eccentric vibrators

+ Robust and resistant

TDX transmissions are a proof of quality and resistance thanks to their materials and construction.

+ Wide range

Different configurations available in transmission lengths to satisfy all needs.

+ Total protection

The TDX transmissions are reinforced at both ends

- Transmission with increased protection at the poker's head connection end
- Easy interchange of transmissions to the motor
- Strengthened with metallic mesh
- TDXE transmissions go with AX25 and AX32 poker
TDX transmissions go with AX40, AX48 and AX58
