

COMPACTION RANGE

REN 655

Walk-behind double-drum roller

The REN 655 walk-behind dual-vibration roller delivers excellent performance in both soil and asphalt compaction - thanks to the optimally integrated frequency and two vibration stages.

- Large-size water tank (40L), very easy to disassemble
- It offers great maneuverability thanks to its handling lance
- Fully hydraulic movement and vibration systems, requiring less maintenance and less need for spare parts
- Improved forward and backward speed and performance

TrackPro Bluetooth device available.

+ Maneuverability

Thanks to the 500mm distance between axes, it makes turning the machine easier.

+ Robust and resistant

Shockproof structure to protect the motor and extend its lifespan.

+ Economy of use

The easy, tool-free access to all service points makes the REN 655 a simple and economical solution for every construction site.

+ Optimized design

No side overhang for optimum compaction up to the edge of walls or curbs.

Technical Data

MODEL	Empty weight (kg)	Centrifugal force (kN)	Speed forw./backw. (km/h)	Frequency (Hz)	Distance bw. axes (mm)	Drum width (mm)	Width (mm)	Engine	Water tank (L)
