

VIBRATION RANGE

PNU

Internal pneumatic vibrators

PNU internal pneumatic vibrators are the best option when an air compressor is available.

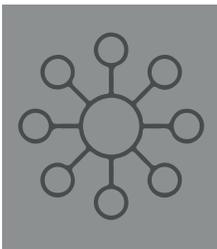

- Standard transmission length: 2m (Other lengths available upon request)
- Recommended working pressure: 6 bars
- The valve does not require maintenance
- Aluminum handle
- Long life oil tank (Recommendation: refill at least once a week)

+
No electricity

PNU vibrators work with air compressors, no electricity is needed.

+
Versatility

Wide variety of poker diameters (up to 100mm) and transmission lengths to suit all types of applications.

+
Resistance

Designed and treated parts that provide long life to the poker.

+
Light and compact

Integrated equipment of small volume that allows great maneuverability.

Technical Data

MODEL	Weight (kg)	Length (m)	Diameter (mm)	Max. performance (m ³ /h)	Speed (r.p.m.)	Consumption (l/min)	Centrifugal force (N)
PNU 25	2.5	220	25	4	20,000	400	700
PNU 40	4.5	300	40	14	19,000	500	2,000
PNU 50	6.5	300	50	22	18,000	600	3,400
PNU 60	10	340	65	27	17,000	1,000	9,000
PNU 80	13	360	75	38	15,000	1,250	12,000
PNU 100	18	390	100	45	13,500	2,000	22,000
